

# ~~THE President Barack Obama Exit Plan~~

31<sup>st</sup>

~~THE Net Neutrality (THE NET Neutrality Bill to regulate Internet as Utilities will be settled out of court and will not require a Supreme Court decision. THE main share benefit to consumers and the concerned technical and digital industry is Internet Services becomes a necessity and not a basic consumer product. Now all people include the poor, who apply for benefits will get subsidized for their Internet services. Meaning on income and liability statements as in Food stamp and other government benefits, a deduction on internet will apply to service benefits amounts, meaning one will get for example more food stamps. This deduction of \$50 to say \$75, can now go towards purchasing more tech and digital products as due to the increase in functionality of Apps based on more people being on the Internet, will also directly increase Tech/Digital products sales. THEN we can do another stimulus package to create jobs, by promoting and funding public Wi-Fi HOT SPOTS. First in public Parks and then on US Interstate Highways. Enhancing the use of Auto-Wi-Fi, and the functionality of Smart Phones, tablets, Laptops and Clicks. In the Bill (due to FCC Security regulations) make it harder to place password protections on consumer Wi-Fi, unless you purchase a personal HOT Box and register it. We cannot sell air space to any and everyone.~~

THIS will also make Internet Television a real option for most Americans, ending this current monopoly on media.

\* ~~Annuance (THE Wild Life Preservation Act)~~ As a result of the burning of many trees, we will address growing new tree trees, preserving the ones we still have, saving wild life as a result and to do this we need to accomplish two major major task. #1) Reduce our demand on paper #2) Reduce Forest Fires. And we can also in the process strengthen our failing public education system. How? 1st introduce the "Water Ways Act" as an imperative action to preserve the Future of America. AKA "The Interstate Water Shams Initiative." You can find a comprehensive explanation on one of my blogs. It will also prevent drought and floods nationwide and insure all Americans always have clean drinking water. 2nd Introduce "THE Public Education E-BOOK Initiative." By replacing Paper Books with E-Books, we can cut down less trees and have added electronics instructors and assistance in our classrooms.

And as a result, I will stop advertising on CBS, until this Hitler Fella resigns (not get fired) quits. And is replaced by my Queen dom. Enough of this Faggot Racist Shit on my damn stations. Meanwhile, Barrack can ~~execute~~ legal weed.
