

THE Washington D.C. Greenhouse Project # P.P. 17E
Place of 41st Ave 10th Street Area Park

(Kinsden or God Applies)
Lighting: Artificial lighting using auto-Environment
class "A" clean room Applications with
Organic blended soils via imports for plants w/ consumer
Safety standards.

Place in 41st side 10th St.
Park in middle of block

In Florida to expand crops of natural organic
marijuana, we have the option of enhanced artificial
lighting using pure light (sunlight) in D.C. we have
the option of LED, high powered - low voltage color
enhanced properties.

William (Billy) Matthews
Under legalized criteria in Washington D.C. we
can expand/increase our supplies using Greenhouse
(Grow Houses) and the goal is to increase production
E-Mail: WYMatthew@yahoo.com / Dr. Jackson Oversight
William (Billy) Matthews - Title - Lead Scientist

#1) He meets with the Microsoft team, he did
some work on programming but has limited
knowledge in computer programming.

#2) Design our auto-environment class "A" room
and all software/hardware requirements.

#3) Determine additional supplies requirements
and anticipated future growth in international
and nationwide markets.

#4) Design and build Greenhouse (Grow House)
Facilities, seek needed management teams and
train needed personnel ASAP.

#5) Design and build electronic surveillance
systems and place non-kinetic security
armed/unarmed into facilities.
