

Any and all Sciences must acknowledge the existence of <sup>#</sup> God, to qualify as a development into Supreme Mathematics. But ~~not~~ <sup>the</sup> most speculative can be considered an absolute truth. P.P.17H

### Questions

How long can we place a person on psychosocial medications? Starting point: 5 years? My experience with psychotropics is the side effects outweighed the benefits by then.

Should we create two marijuana markets? Recreational? Medical? Smoking gives you a euphoric euphoric effect, you get a rush and get high. Pills shouldn't, but will relax your nerves sedate you to sleep 5 or 6 hours and enhance appetite among other things.

The use of AnaFrinal as a sexual appetite reducer during long term therapy or even incarceration: This is called as an anti depressant, which causes you to miss out your semen, preventing sexual related stress in men that is probably why we have such a high suicidal rate among psych patients. Erectile Dysfunction will run a young man out of his mind. And I feel it was done intentionally by the atheist psychiatry doctrine.

And all prescribe medications should be allowed in drug/alcohol recovery, but once any addiction, through Faith in God, you will be healed by a Godly system of Behavioral Sciences.
